

The AL800 series

The AL800 series of equipment fits all nurse call, fire or alarm systems, using discrete light

or contacts panels. This system will perform with panels of any age and is even compatible with panels that are more than forty years old. As soon as an alarm is activated, a pre-programmed message will immediately be sent to one or more pagers.

**Transfer all of your monitoring system information to a pager...
...in a matter of seconds.**

Profitable.

No subscriptions or contracts with pager rental companies.

Reliable.

No phone lines or wires required. Information is directly sent from the system to the pagers. In addition, this is the only way to ensure complete and perfect coverage of all parts of a building at any time.

Discrete.

Eliminate the noise from alarms systems and intercom audio paging. Only those persons concerned are notified.

Rapid.

Numeric or alphanumeric messages are received instantaneously.

Efficient.

Messages are kept in the pager memory, so the user can read them at his or her convenience. No messages get lost.

Compact.

A complete system for 100 points (or 100 lights), with a transmitter, fits in a 14" X 14" X 6" electrical box.

“...Surely the least expensive system on the market, but also the one with the highest performance!...”

The AL800 series

* Options available but not required for a basic operations.

Basics characteristics

- ◆ 5 Watts of radio power
- ◆ 12Vdc power supply
- ◆ Complete electrical insulation through Opto-isolator.
- ◆ Completely programmable
- ◆ Multi-pager calling
- ◆ Completely modular and expandable system.
- ◆ Integrated POCSAG encoder.

For:

- Industry
- Hotels
- Hospitals
- Long-term care facilities
- Nursing homes
- Farms
- Schools and universities
- Detention centers
- Court houses
- Emergency and psychiatric departments.....

Use:

- Nurse call systems
- Access control systems
- Fire systems
- Alarm systems
- Production lines
- Process control
-

Many pager models available...
